cube LITE

Light design

CubeLITE is the little sister in the cube series and impresses with her simplicity.

Less is just right

Minimal design

CubeLITE is a phoropter trial place. It can mount a manual or an automatic phoropter. The phoropter's control elements will be placed at a practical position.

Right oder left

CubeLITE is available as right or left hand unit. A light control can be added.

Linear or tilting

This unit is equipped by a linear phoropterarm. A tilting phoropterarm is also available.
